Revised Feb 2021 City of Maple Ridge

11995 Haney Place, Maple Ridge, BC V2X 6A9 Tel: 604-467-7311 Fax: 604-467-7461 Enquires at: buildingenquires@mapleridge.ca Web site: www.mapleridge.ca

BUILDING HEIGHT:

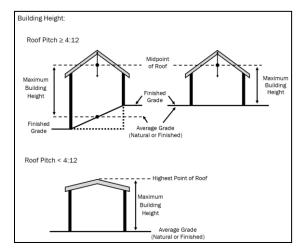

- 1. The Building Height shall be measured as the vertical distance from either:
 - a. the Average Finished Grade, or
 - the Average Natural Grade for subdivisions of less than three (3) Lots and for infill Developments which are not required by the Municipal Engineering Department to provide a Comprehensive Lot Grading Plan,

LOCALIZED DEPRESSION:

- 1. an existing localized depression in Natural Grade not exceeding 3 metres (9.8ft.) in width, or 20% of the building length that it abuts, whichever is less;
- 2. a localized depression below Finished Grade providing vehicle or pedestrian entrances to a building shall be subject to the following conditions:
 - a. only one vehicle entrance and one pedestrian entrance are shall be considered as Localized Depressions on a single family or two unit residential building.
 - on any side of the building in a single detached or two unit residential building, the Localized Depression width shall not exceed the lesser of 50% of the corresponding building width or:
 - i. 6.0m (20 ft.) width for vehicle access.
 - ii. 2.44m (8 ft.) wide 3.0 m² in area for a pedestrian access, or
 - iii. 7.3m (24 ft.) wide for a combined vehicle and pedestrian access
 - where a localized depression for a pedestrian entrance is completely covered by a deck attached to the storey immediately above it, the localized depression shall be exempt.
 - 4. any combination of vehicle or pedestrian entrances and exist ing depressions remaining after finish grading shall not exceed 50% of the corresponding building width or length along any side of a building.

HIGHEST BUILDING FACE EXEMPTIONS:

- a. a maximum 40% of the length of the building face can be exempt from this regulation.
 Different portions of the building face can be exempted, provided that the sum of their lengths does not exceed 40% of the total length of the building face;
- b. roof eaves, decks, decorative features, and the pitched roof portion of either gable ends or dormers are exempt:
- c. any portion of the roof Structure above the top plate is exempt from this calculation; and
- d. 100% of the length of the rear Building Face is exempt for Lots where the entire Rear Lot Line abuts land dedicated by subdivision for Park purposes within which a Watercourse exists, as identified on Schedule "C" Natural Features of the Maple Ridge Official Community Plan Bylaw No. 7060-2014 or the Streamside Setback Assessment Map of the Maple Ridge Watercourse Protection Bylaw No. 6410-2006, provided that the rear Building elevation is identified as the highest Building Face.

(a) Localized Depression in natural grade
