The Clerk as assessor returned his copy of the Assessment Roll and gave statement of assessment.

The following reports were received on Road Committee Ward No 1 That according to instructions they had inspected the Worg bridge and found it unsafe for the public as at present and recommending that it be finished by covering it as soon as possible. And having been requested by some of the ratepayers to examine the road leading to the Rustin Mill; and the proposed change through Mr Treggs property. The road leading to Mr Whitmans property. Also the proposed change over Charnock Creek and beg to report favorably on the changes asked for.

Road Committee Ward No 3. Reporting on the repairs asked for by Pathmaster Bosomworth on Kanada lane road and found that the repairs were required, but as Mr Crawford had made complaints that unless arrangements were made between the Council and himself he would demand arbitration on said road, we thought it better to let the matter lie over.

The collections for Feb as reported was \$103.⁰⁸ Mr Williams attorney for Mr Crawford being present the Rules of order were suspended to allow the Council to hear him regarding Mr Crawford's claim. re Kanada lane road. After the matter had been discussed at considerable length

It was agreed that the Council would meet on the 17th inst to receive any proposition that Mr Crawford might make.

The Council met pursuant to adjournment, Saturday March 17th at 10 am.

Present the Resps and full Council to communication from Mr. Braufon and a copy of same from Mr. John T Williams were received and read as follows viz In accordance with the wishes of the Council expressed at their last meeting, I send you the following letter stating the amount I am willing to accept as compensation or damage to Lot 404, in consequence of the Council laying roads through same. I find that the amount of acreage is $7 \frac{3}{4}$ acres, on the Kamaka Lewis, Parkison and Barrington Roads, this calculated at \$25.⁰⁰ per acre, which is the price I am selling the lots, through which these roads run, comes to \$184⁰⁰, I do not consider this compensation at all, it is merely giving me back the property that the Municipality has taken from me. With regard to compensation, I am willing to accept \$100⁰⁰ to be deducted from my taxes, this year, and the Council to agree to put my the equivalent of \$200.⁰⁰ in statutory labour on the road I am opening up through the center of the R.R.'s of Section 10. If the Council are willing to accept this extremely reasonable proposition, I am willing to give an agreement renouncing the above arrangement. If not the matter can go to arbitration.

Frank W. Dohm Esq
Indian Agent
New Westminster

Dear Sir, I am directed by the Reeve
and Council of the Municipality of Maple
Ridge to ask the permission of the Indian
Authorities to gazette and construct a
wagon road over some practicable route
through the Skamokwa Indian Reservation.

The proposed road is an important
link in the chain of roads which will
ultimately connect the villages lying along
the north bank of the Fraser; Skamokwa and
Ruskin though not more than three miles
apart are almost as effectively isolated
as if on separate islands and many settlers
cannot drive to either village though within
easy distance of both. Skamokwa and
Ruskin while possessing some features
in common (Post Office, stores &c) are yet on
a large measure complimentary to each other.
Ruskin has a saw mill and blacksmith's
shop but has only limited railway facilities
while Skamokwa has comparatively full
railway facilities with special return rates
to the cities and a telegraph and ticket
office. All concerned; the residents, the
Indian Authorities and the Indians them-
selves will agree with the council that road
facilities between the two points are of present
vital importance to the residents.

Any such road will necessarily pass
through the Reservation.

The present route, itself running through
the Reservation, has long grades coming

from 1 m 3 to 1 m 7 on both banks of
Wharver's gully and is quite impractical.
North of the correction line there is
apparently no feasible route.

Many lines south of the correction line
have from time to time been suggested, but
in the judgment of the council the only
satisfactory one is that lately surveyed by
Mr Bell.

The Indians however, though apparently
unopposed, to the proposition when made
by our Road Committee last year, have
recently informed the council that they
object to any road south of the correction
line, where alone a roadway is practicable.

The opposition of the Indians, however,
in the opinion of the council is more
apparent than real and is based on an
entire misconception of the objects of the
settlers. There is no desire on the part of
the council or of my settlers to needlessly
cut up the reservation or to drive out the
Indians, as they have said and apparently
believe. The sole object of the settlers and the
council is to select a feasible route
within the financial ability of the municipality.

The only cultivated land which the
survey crosses is a strip 20 to 30 yards wide,
almost the entire line of division runs
through ~~now~~^{old} or village commons.

If all settlers under similar circum-
stances opposed roads through their lots
the district would be practically without
roads, owing to the difficult nature of the

country almost every settler's lot is cut into or zig-zagged through and that without compensation - the advantage of having the road, being in nearly every case, more than an offset for any damage by cutting up the lands.

The Council desires to point out that the roads are not for the exclusive use of the white settlers, though entirely built and maintained by them. Every white settler has his annual assessed road tax or statute labour and in addition performs a large amount of labour voluntarily, when the roads are built they are used by Indians and whites alike. The Indians have as many horses as the whites, often more, and freely use the roads, while they contribute nothing in money or labour for their construction or maintenance.

In the opinion of the Council therefore it is entirely reasonable that road allowances should be readily and fairly granted by the Indian Authorities, when the necessity for such is clearly apparent. Moreover, the Municipality owing to the demand for roads every where within its limits, is not in a position, unless in most exceptional cases, to give any compensation for right of way. The Council feels sure that you will not attach undue importance to the temporary opposition of the Indians, when they and the settlers alike will benefit by the proposed changes.

The Council is informed that there are not more than 4 or 5 bona fide adult Indians on the Whitemud Reservation,

and it is believed that the consent of them
if left to themselves could be easily obtained
so the chief objectors and agitators appear
to be residents on the Reservation, who
have no standing as Indians, such
as the other family who are on the
Provincial voters list, and others.

If your department should not feel
entirely satisfied that the most suitable
route is that indicated in the survey,
the council would suggest that the
selection of the road be left to an engineer
acceptable to the Indian Authorities and
the council.

I am instructed to ask that you
will kindly submit this letter to the
commissioners with other papers bearing
on the subject.
