

## ALOUETTE PARK PLAYGROUND

The playground renovation in Alouette Park is complete! Accessible pathways were installed to the ramp leading to the second level of the new play structure and to the ground level play components.

The new playground provides more accessibility and has a new "Spinning Sensory Wave Seat" and the "Zero -G" swing chair. Some of the other features include a curved balancing beam, "Wave Slides" and the "River Rock Climber". The swing set consists of two regular swings, a toddler swing and an inclusive "Zero - G" swing chair.
