The clerk as assessor returned his copy of the Assessment Roll and gave statement of assessment.

The following reports were received viz Road Committee Ward No 1 That according to instructions they had inspected the Worg bridge and found it unsafe for the public as at present and recommending that it be finished by covering it as soon as possible. And having been requested by some of the ratepayers we examined the road leading to the Rustin Mill, and the proposed change through Mr Swiggs property. The road leading to Mr Whithams property. Also the proposed change over Whamond Creek and try to report favourably on the changes asked for

Road Committee Ward No 3. Reporting on the repairs asked for by Pathmaster Bosomworth on Kanada level road and found that the repairs were required, but as Mr Crawford had made complaints that unless arrangements were made between the Council and himself he would demand arbitration on said road, we thought it better to let the matter lie over.

The collections for Feb as reported was \$108.⁰⁸ Mr Williams acting for Mr Crawford being present the Rules of order were suspended to allow the Council to hear him regarding Mr Crawford's claim on Kanada level road. After the matter had been discussed at considerable length

it was agreed that the Council would meet on the 17th next to receive any proposition that Mr Crawford might make.

The Council met pursuant to adjournment, Saturday March 17th at 10 am.

Present the Rev. and full Council
 A communication from Mr Crawford
 and a copy of same from Mr John T
 Williams were received and read as
 follows viz In accordance with the
 wishes of the Council expressed at
 their last meeting, I send you the follow-
 ing letter stating the amount I am
 willing to accept as compensation or
 damage to Lot 404, in consequence of
 the Council gazetted roads through
 same. I find that the amount of
 acreage is $7\frac{3}{4}$ acres, on the Kanaka
 level, Parferson and Barrington
 Roads, this calculated at \$25.⁰⁰ per
 acre, which is the price I am selling
 the lots, through which these roads run,
 comes to \$187.⁵⁰, I do not consider this
compensation at all, it is merely giving
 me back the property that the Municipal-
 ity has taken from me. With regard to
 compensation, I am willing to accept
 \$100.⁰⁰ to be deducted from my taxes, this
 year, and the Council to agree to put
 my the equivalent of \$200.⁰⁰ in statute
 labour on the road I am opening up
 through the center of the N.W. 1/4 of section
 10. If the Council are willing to accept
 this extremely reasonable proposition, I am
 willing to give an agreement embodying
 the above arrangement. If not the matter
 can go to arbitration.

Port Henry May 8th 1901

Frank Edwin Esq
 Indian Agent
 New Westminster

Dear Sir, I am directed by the Reserve and Council of the Municipality of Maple Ridge to ask the permission of the Indian Authorities to locate and construct a wagon road over some practicable route through the Wharved Indian Reservation.

The proposed road is an important link in the chain of roads which much ultimately connect the villages lying along the north bank of the Fraser; Wharved and Huxkin though not more than three miles apart are almost as effectually isolated as if on separate islands and many settlers cannot drive to either village though within easy distance of both. Wharved and Huxkin while possessing some features in common (Post office, stores &c) are yet on a large measure complementary to each other. Huxkin has a saw mill and blacksmith shop but has only limited railway facilities while Wharved has comparatively full railway facilities with special return rates to the cities and a telegraph and ticket office. All concerned; the residents, the Indian Authorities and the Indians themselves will agree with the Council that road facilities between the two points are of paramount vital importance to the residents.

Any such road will necessarily pass through the Reservation.

The present route, itself running through the Reservation, has long grades overlying

from 1 in 3 to 1 in 7 on both banks of Wharfedale gulch and is quite impracticable.

North of the correction line there is apparently no passible route.

Many lines south of the Correction line has from time to time been suggested, but in the judgment of the Council the only satisfactory one is that lately surveyed by Mr Hill.

The Indians however, though apparently unopposed, to the proposition when made by our Road Committee last year, have recently informed the Council that they object to any road south of the Correction line, where alone a roadway is practicable.

The opposition of the Indians, however, in the opinion of the Council is more apparent than real and is based on an entire misconception of the objects of the settlers. There is no desire on the part of the Council or of any settler to carelessly cut up the reservation or to drive out the Indians, as they have said and apparently believe. The sole object of the settlers and the Council is to select a passible route within the financial ability of the municipality.

The only cultivated land which the survey crosses is a strip 20 to 30 yards wide, almost the entire line of deviation runs through woods or village commons.

If all settlers under similar circumstances opposed roads through their lots the district would be practically without roads, owing to the difficulty nature of the

country almost every settler lot is cut into or jagged through and that without compensation - the advantage of having the road, being in nearly every case more than an offset for any damage by cutting up the lands.

The Council desires to point out that the roads are not for the exclusive use of the white settlers, though entirely built and maintained by them. Every white settler has his annual assessed road tax or statute labour and in addition performs a large amount of labour voluntarily, when the roads are built they are used by Indians and whites alike. The Indians have as many horses as the whites, often more, and freely use the roads, while they contribute nothing in money or labour for their construction or maintenance.

In the opinion of the Council therefore it is entirely reasonable that road allowances should be readily and freely granted by the Indian Authorities, when the necessity for such is clearly apparent. Moreover, the Municipality owing to the demand for roads every where within its limits, is not in a position, unless in most exceptional cases, to give any compensation for right of way. The Council feels sure that you will not attach undue importance to the temporary opposition of the Indians, when they and the settlers alike will benefit by the proposed changes.

The Council is informed that there are not more than 4 or 5 bona fide adult Indians on the Whomock Reservation,

and it is believed that the consent of them if left to themselves could be easily obtained so the chief objectors and agitators appear to be residents on the Reservation, who have no standing as Indians, such as the Churo family who are on the Provincial voters list, and others.

If your department should not feel entirely satisfied that the most suitable route is that indicated in the survey, the Council would suggest that the selection of the road be left to an agency acceptable to the Indian Authorities and the Council.

I am instructed to ask that you will kindly submit this letter to the Commissioner with other papers bearing on the subject.

Moved by Lemm Webster }
 Sec " " Hodgson } that the Council
 adjourn. Commr
