Mr. Percy Ward, Inspector of Hospitals was present. The Reeve asking his advice as how it could be handled and requested the following information: First advisability, Second - size, Third- Cost, and Fourth- Government Contribution. Mr. Ward stated that it was advisable to have a hospital if it could be handled financially. Question of size - He stated that for efficiency a minimum of 50 beds would be required. Cost- Approximately \$5000.00 per bed. This did not include equipment. Equipment for a hospital this size would run between \$25,000 and \$50,000 or more. Government Contribution- There was nothing definite in this regard but that normally if the hospital or proposed hospital received the approval of the Provincial secretary, they had in the past contributed one third of the cost of construction.

Mr. Ward stated that there were only two Municipally owned hospitals and recommended that a hospital should be handled by a purely Voluntary organization financing itself through contributing a fair share of finance for construction and a separately registered society to operate it. He was of the opinion that if a voluntary group were to obtain subscriptions for say one third, the Council to pass a bylaw contributing one third and the government contributing one third would be to his mind very satisfactory.

Minutes of March 1st, 1947 - continued.

It would appear from his remarks that Mr. Ward did not favour altogether a hospital financed completely by a Municipal bond issue. Mr. Ward was also questioned as to the turning away of patients by a hospital. His reply was that genuine cases requiring hospitalization would not be turned away.

Moved by Councillor Brown and Seconded by Councillor Langley:  
"That a vote of thanks be extended to Mr. Ward for his attendance and his advise.
