

Date: \_\_\_\_\_

Developer: \_\_\_\_\_ Subdivision no.: \_\_\_\_\_

Legal description: Lots \_\_\_\_\_ to \_\_\_\_\_ Plan no.: \_\_\_\_\_

I \_\_\_\_\_ the (civil/geotechnical) engineer of record verify that the retaining walls as shown on the approved lot grading plan dated \_\_\_\_\_ have been constructed and completed by the developer in general accordance with the grades shown on the approved lot grading plan. Also, I confirm the retaining walls have been built to good engineering standards under my supervision and inspection(s). Further, these walls meet all requirements, including the approved structural and grading design drawings, the City's Comprehensive Lot Grading Policy, and applicable City bylaws.

In addition, I am satisfied that the current lot grading and location of retaining walls will not have a negative impact on house construction, adjoining lots, and final grades.

Dated at Maple Ridge, BC, this \_\_\_\_\_ day of \_\_\_\_\_, 20 \_\_\_\_\_
